

Tile Mosaic

This mosaic board is a collaboration of work of all the children in the nursery from babies to pre school.

The mosaic pieces were cut into pieces, using different sizes and colour pieces of tile the children glued them into place with PVA .

The children talked about the different colours and shapes and how they could use the different colours and shapes to make different pictures.

As each picture piece was done the board was put back together as a whole so that the children could see the wonderful scene that they had created from working together with the unique individual pieces.
